Projects

Blue Team Cross-Analyzer (Python)

August 2025 - September 2025

- Built a Python tool to analyze authentication, IDS, and firewall logs for suspicious activity.
- Detected failed logins, malware alerts, and blocked IPs to identify potential threats.
- Extracted and cross-checked IP addresses across multiple log sources efficiently.
- Generated automated reports summarizing all suspicious events for blue team monitoring.
- Improved visibility and quick assessment of the network security issues for proactive response.
- GitHub Repository Link: <https://github.com/BabluCSE111/BlueCrossAnalyzer>

Event Reminder Application – JavaFX

May 2025 – July 2025

- Developed a JavaFX-based desktop application to manage and track events efficiently.
- Implemented user-friendly interface for adding, editing, and deleting events reminder.
- Enhanced time management and productivity through automated reminder alerts.
- Integrated real-time notifications to alert users before event start times.
- Github Repository Link: <https://github.com/BabluCSE111/Darkboy1/blob/main/EventReminderApp.java>
